

ROBOTIC PARKING SYSTEMS, INC.

Robotic Parking Systems Inc. announces that it is ISO 9001:2015 Certified

Clearwater, Florida 16 January 2017 ---- Robotic Parking Systems Inc has officially announced that it completed the rigorous audit process and is now ISO 9001:2015 Certified for the Design and Installation of Robotic Parking Systems.

During the course of the audit all of the company's processes and procedures involved in the design and installation of its patented automatic parking system were examined and verified. These processes include employee hiring and evaluation, vendor evaluations, purchasing procedures, design drawings and revision tracking, quality control methods and installation procedures to name a few.

Royce Monteverdi, CEO, stated, "Robotic Parking Systems has always strived to offer the highest quality automatic parking to our customers. Having certified the management processes and procedures that bring about a high standard of quality control is a major accomplishment and increases client confidence in our company."

About Robotic Parking Systems, Inc.

Founded in 1994, US-based Robotic Parking Systems Inc. pioneered the development of the high-capacity, scalable automated parking garage. A robotic parking system reduces the space needed for cars by 50% and creates more space for design, development and the community. The speed and efficiency of their patented technology creates, for the first time, opportunities for projects requiring 350 up to several thousand parking spaces to profit from the space-saving, environmental and safety benefits of automated parking.
